

Plantes sauvages de Mbouda

Mbouda
11 March 2009

Page numbers refer to Akobundu & Agyakwa (1998) *A handbook of West African weeds*. IITA Ibadan. This also exists in a French version, but there are no useful local names in African varieties of French.

The following identifications were based on a primary interview circle. Numerous plants were identified but the names were not known. Where identification is doubtful, a question mark is placed in the text.

Latin	English	Ngiemboon	Commentaire	Français
?		lepúmúo kwøb		
?		matsáŋ ngwáj		
<i>Acanthospermum hispidum</i>	bristly starbur	tswé nòon ndón	p. 161	
<i>Acroceras zizanioides</i>		nyé' ŋu'	p. 71	
<i>Aeschynome indica</i>		nkem ngù	p. 55	
<i>Ageratum conyzoides</i>	goatweed	ncwòmamúo	p. 163	
<i>Alchornea cordifolia</i>	Christmas bush	ntentànshùŋ; nténtànšìŋ	p. 253
