TABLES

Error! No table of figures entries found.

1. Introduction

This is a short wordlist of the Dogul Dom language, part of the Dogon group, spoken in northern Mali. The wordlist was collected from a group of villagers in Bangel Tupe on the 23rd of February 2005. I would like to thank them for their patience.

The wordlist was collected as a ‘one-shot’ exercise and the transcription must therefore be regarded as preliminary. This analysis was prepared by Roger Blench, who added the comparative observations¹. This document is being circulated to scholars for comment.

2. Location, history and sociolinguistic situation

2.1 Nomenclature

The elders at Bangel Tupe gave the name of the language as Dogul Dom.

2.2 Location and settlements

The other Dolgul villages given were;

Dongosori, Kangyalam, Irigili, Dyamongo [the Dogul ward is Tuguru], Madina, Duro, Pelemi, Somoli, Ken Taba Sigang, Ken Taba Dana, Komoni Sigang, Komoni Dana, Menemene, Bengeli, Bor, Binu, Girikomb

2.3 Language status

The Dogul Dom language is presently being transmitted to the children. The second language of Dogul Dom speakers is Fulfulde, the dominant language in the zone. There is a limited amount of French spoken, usually by migrant workers or students. Hochstetler et al. (2004) give the population from the 1987 census as 12,200.

2.4 Dogul Dom culture and history

2.5 The classification of Dogul Dom

Calame-Griaule (1956:67) says;

Dogul dom

Il est parlé par 3.000 personnes environ; son aire comprend quelques villages des cantons de Kambari-Bandiagara, Oussabari-Ouroli et Saré, ainsi que le canton de Nandoli en entier.

3. Phonology

The phonology of Dogul Dom is based on rapid observations and should therefore be regarded as tentative at this stage.

3.1 Vowels

Dogul Dom probably has seven phonemic vowels;

	Front	Central	Back
Close	i		u
Close-Mid	e		o
Open-Mid		ɛ	ɔ
Open		a	

Dogul Dom permits all vowels to be long or short and all short vowels can be nasalised. Examples of nasalised long vowels are not so far recorded, but certainly exist in other Dogon lects.

¹ The authors are grateful to Eric Huysecom and the Swiss Ethno-archaeological project for providing funding for this survey.

3.2 Consonants

Dogul Dom consonants are as follows:

	Bilabial	Alveolar	Alveopalatal	Palatal	Velar	Labial-velar	Glottal
Plosive	p b	t d		[j]	k g		
Nasal	m	n		n	ŋ		
Trill		r					
Fricative		s z	[ʃ] [ʒ]				h
Approximant				y		w	
Lateral Approximant		l					

There appears to be certain amount of allophonic or free variation between voiced and voiceless alveolars and velars especially in medials. Thus a single elicitation session two speakers may produce the same word with k/g/, t/d. The same is true of the palatal forms of alveolar fricatives; these seem to be in free variation with non-palatal forms. [ʃ] and [ʒ] are may not be distinct phonemes and /s/ and /ʃ/ can be produced in parallel especially in initial position, perhaps reflecting perceptions of sentence context. However, in some words, /ʃ/ can be strongly palatalised, possibly a remnant of a lost syllable.

3.3 Tones

Dogul Dom has two tones, High and Low.

4. Morphology

4.1 Nouns

Plurals of nouns in Dogul Dom are typically formed by the suffix -. Thus;

Gloss	sg.	pl.

5. Dogul Dom wordlist

The wordlist was elicited via French and Fulfulde. This is not entirely satisfactory as pervasive multilingualism among the Dogon means that speakers could well be influenced by the phonology or lexis of the second language. The most likely uncertainties in transcription are vowel length, nasalisation versus syllable-final nasals and the distinction between /e/ and /ɛ/ and /o/ and /ɔ/.

Very incomplete!
