Tocco [Tocho] is a Talodi language related to Lumun and Acheron. This wordlist was among the files in SIL Khartoum in an old Shoebox format. I assume it dates from the mid-1990s. I have turned it into a Word file and made various editorial updates as follows;

1. Obvious spelling errors corrected
2. Some IPA symbols added
3. Begun the process of pairing singular and plural
4. Duplicate entries deleted
5. Parts of speech added or emended

One problem is duplicate plural entries where the nominal prefix changes. I am trying to sort these out. The other is the use of 'tree' etc. meaning a specific tree. It is this hard to determine the generic form.

On a comparative note, Tocco has numerous clear Niger-Congo cognates. I hope to note these in future versions.

There is also hand-written notebook of Tocco material I have xeroxed, but it is hard to use. Still I may begin to add it to the file.

**Tocco wordlist: Roger Blench**
